

## Communiqué de presse

January 2006

### Schneider Electric at the Interclima + elec trade fair

**Rueil-Malmaison, January 16, 2006** – This year's Interclima +elec trade fair – at Paris Expo, Porte de Versailles, from January 17 to 20, 2006 – focuses on technical finishings and the communicating building.

One of the main goals of this professional event is to act as a driving force for the distribution of innovations and solutions aimed at improving the energy performance of buildings.

Its other objectives, in a context of the opening out of trades and professions, are to create a new platform of contacts and exchanges, accompany the opening up of energy markets and serve as a space for the presentation and promotion of innovations.

This makes it the not-to-be-missed event, providing an opportunity for an update on the latest novelties and major trends in a sector that represents more than a third of the building market.

#### **Schneider Electric systems and products: from Residential to Service**

Schneider Electric will be part of the event, exhibiting numerous products and systems covering the Residential, Tertiary, Industrial Building and Services sectors.

A huge range of the group's products, equipment, solutions and services will be presented on stand B19. With its coverage of four key sectors in the building market, Schneider Electric shows the extent of its innovations and the sheer scale of its investment in this field.

Panorama.

#### - **Residential:**

Alvidis communication networks, Alvaïs antibacterial ultra terminal equipment, FIP'clic electric heating manager, domestic technical conduit solutions, DuoLine modular switchboards and equipment, Merlin Gerin portable Multi 9 label printer.

#### - Tertiary:

Building Automation, Control access security (Continuum, DVX), Altivar 21 and Altivar 61 variable speed drives, Alombard ultra terminal 45\*45 equipment; Pyros autonomous block safety lighting and Canalis KDP prefabricated flexible conduits, Digital videosurveillance recorders

#### - **Industrial Building:**

Prisma Plus system P distribution cell, Prefabricated Biosco HTA/BT stations, Lubio voltage regulator for public lighting, Transparent ready Equipment.

#### - **Services:**

Pre-diagnostic and full check-up for electrical installations, Energy performance to improve the comfort of buildings.
